

Whatever new hydraulic machinery you are planning to build, Parker can help you bring it to life while fulfilling your long term strategic business goals.

Introducing machinery development services that will yield a greater return on investment on your next new machinery.

Parker Mobile Systems Division

Bringing Parker's Mobile Systems Team into the development of your next new machine will save you money and time while giving you a more successful product.

Parker now offers high end systems development services to machine manufacturers. We can work with you to develop the optimal hydraulic system for your next new machine. When you work with us, you get the best hydraulic systems know-how available.

Parker is the global leader in the hydraulic systems market. With over 450 development and manufacturing facilities, we have the resources to help you reach your sales goals and ROI.

Parker Mobile Systems Division

**Parker saves you months of
development time so you can
bring your next new machine
to the market faster.**

Working with Parker will minimize the time it takes to bring your machine from the drawing board to the sales floor. Our systems development team has the experience to solve complex problems efficiently so that your project moves forward quickly. Call Parker today and you will have your next new machine on the sales floor in no time.

Parker Mobile Systems Division

Parker optimizes your new hydraulic system so that it costs less to manufacture.

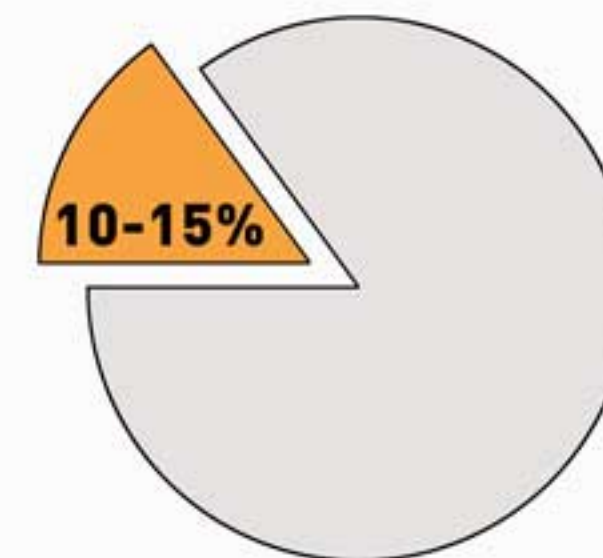

10%
LOWER
MANUFACTURING
COST

Hydraulic systems developed by Parker are less costly to manufacture because we utilize the latest technology requiring less parts while still offering more functions. When developing the hydraulic system, we carefully examine your goal and build the new hydraulic system from the bottom up. You get a system where each part is made specifically for its planned function. This way, we can lower your manufacturing cost by 10% leading to a good ROI for you.

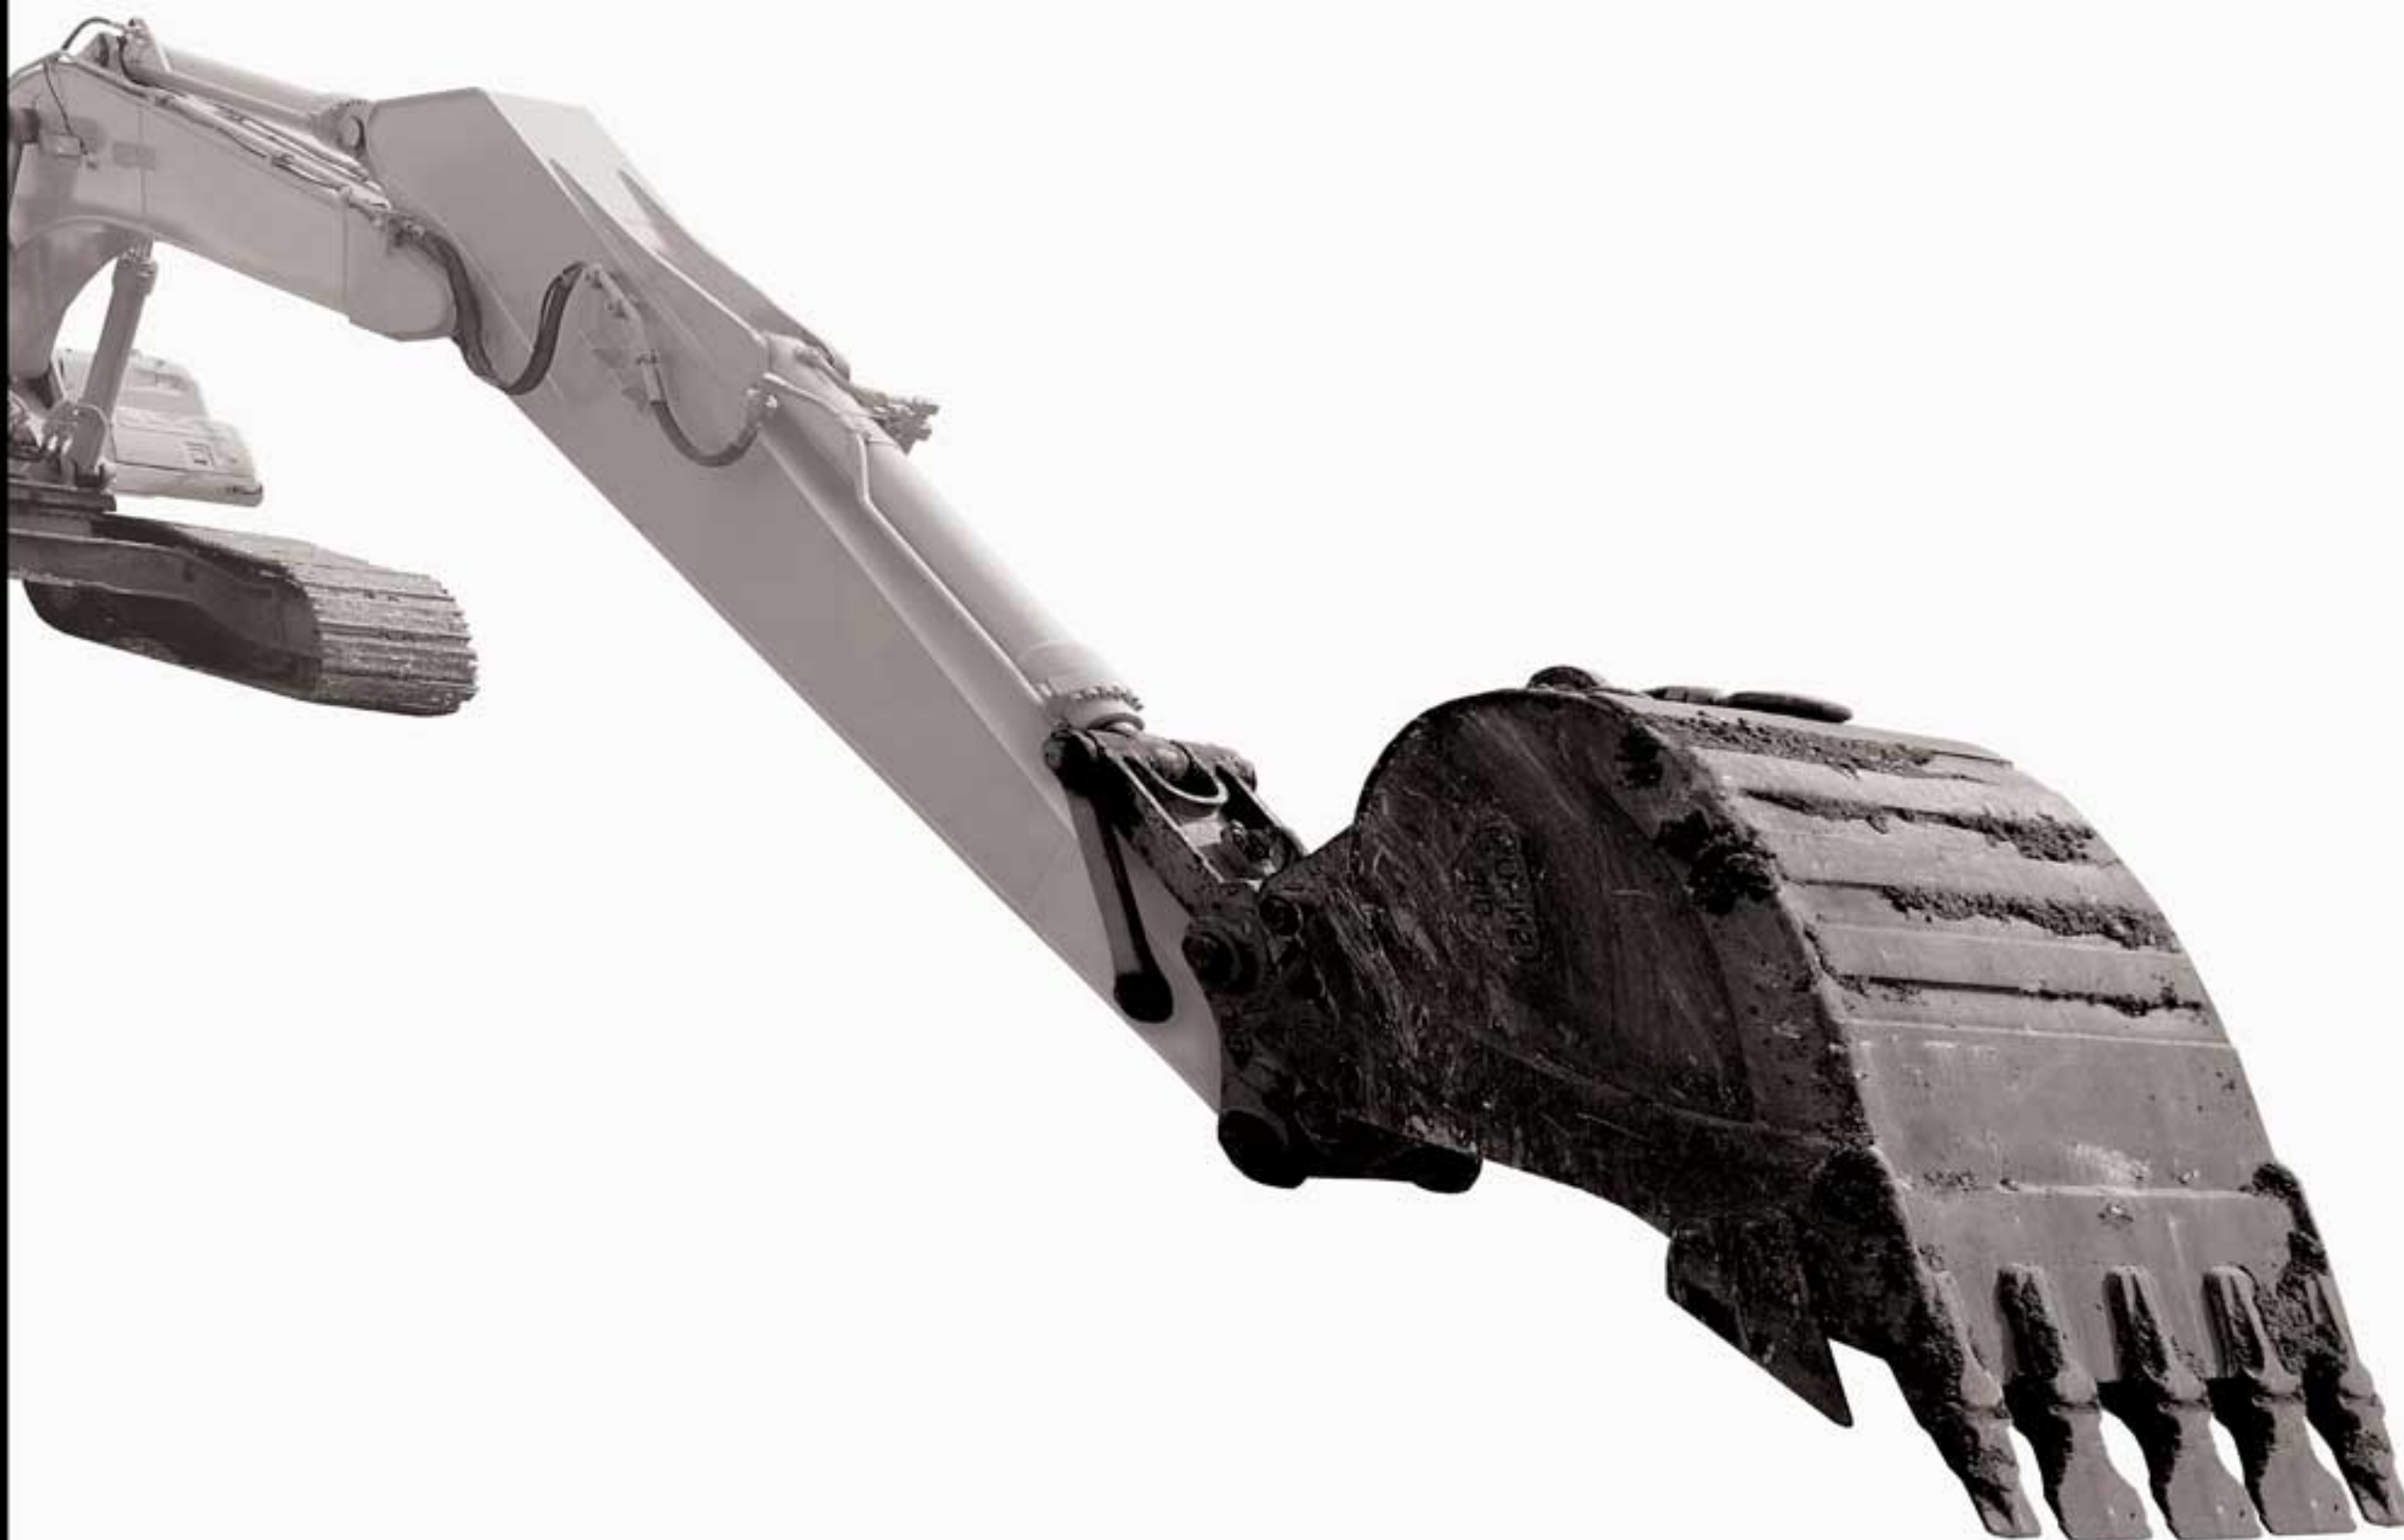

Parker Mobile Systems Division

**Working with Parker lets you
grab a larger market share.**

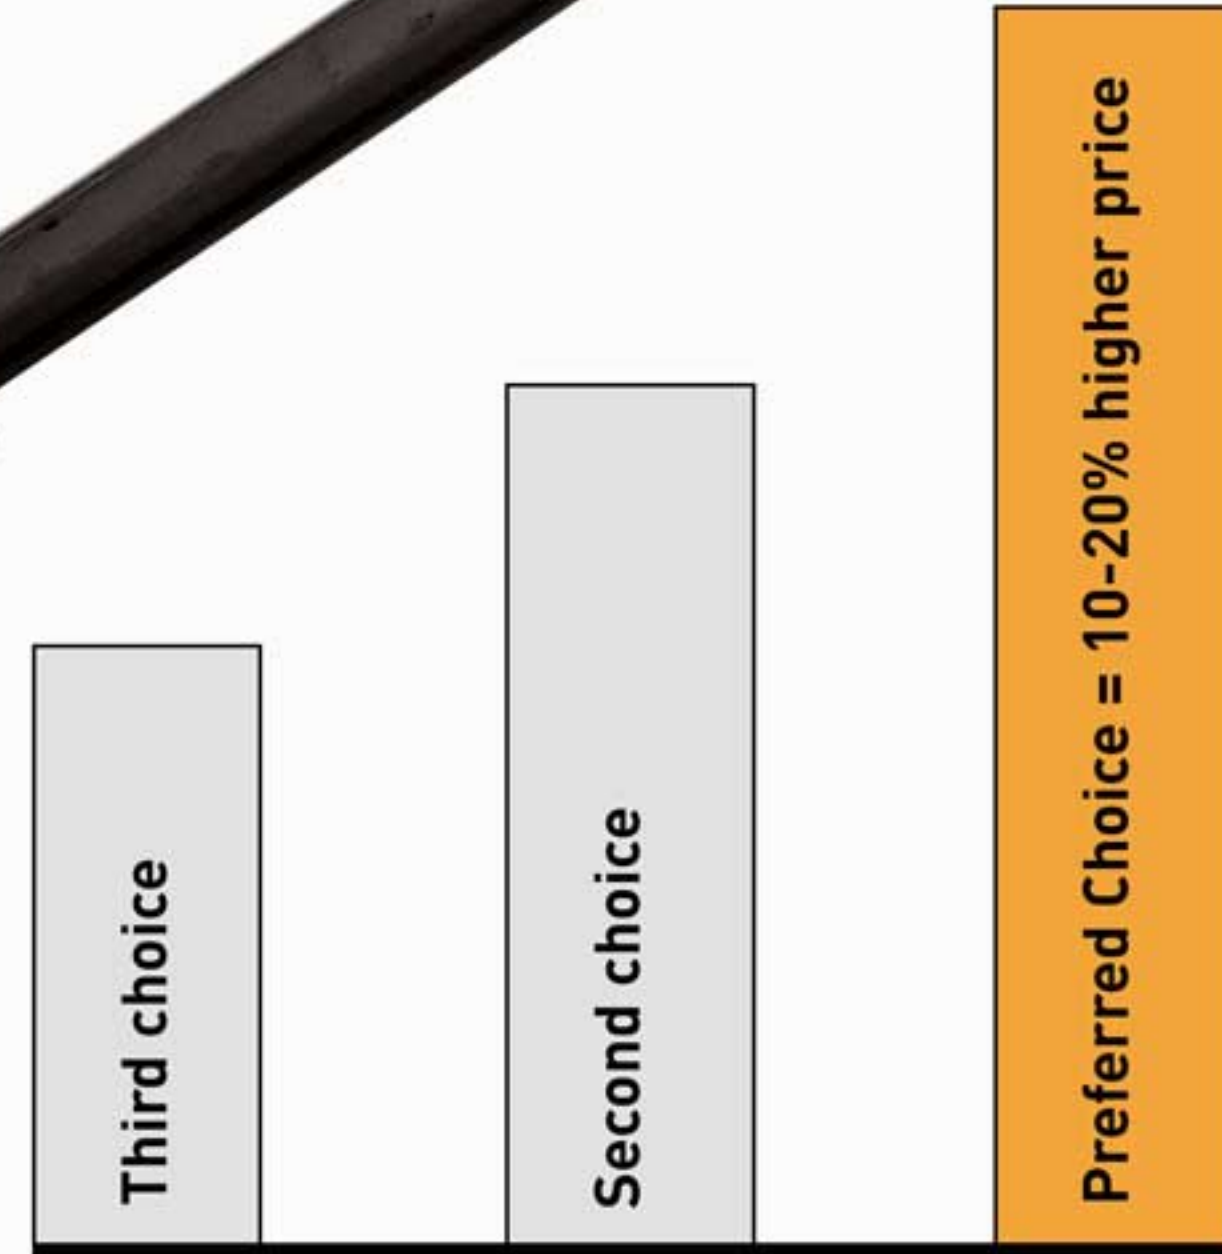

When your new machinery comes with the best hydraulic systems solution, customers will notice and the press will write about you. Generally the best product earns 10 to 15% greater market share than it's closest competitor.

Parker Mobile Systems Division

When you work with Parker, your machinery has a higher market price, putting more money in your pocket.

The preferred product in a market can charge a 10 to 20% higher price. When you work with Parker, we ensure that the hydraulic system is what the customers wants.

Parker Mobile Systems Division

When working with Parker, your next new machine will stay on the market for an extended time.

2021

Parker's advanced research teams are continuously bringing new components to the market which makes us able to provide you with solutions that nobody else can offer. A superior product has the advantage of staying longer on the market. That means that your next new machine could be profitable for up to 15 years without any major changes. Fifteen years at a premium price point equals some serious return on your development investment.

Parker Mobile Systems Division

**Parker's optimized systems
need 20% less energy.**

Systems developed by Parker require less fuel because all parts are optimized for the specific function that the machine is intended to perform. With today's fuel prices, low energy consumption means a great market advantage. Lower operating costs leads to a better customer relationship. You get return buyers who will gladly promote your products. Parker's systems solutions create advantages that results in long lasting returns on your investment.

Parker Mobile Systems Division

Parker's hydraulic systems come with a 3 year, zero-leak warranty.

Parker's hydraulic systems come with a 3 year, zero-leak warranty, attracting today's buyers who need equipment that performs for years to come. We stand behind our products and services so that you can stand behind yours.
